Education

B.Sc. in Computer Science – Suez Canal University — Egypt
GPA: 3.60/4.00 | Ranked 2nd in Class | 2x Academic Excellence Award — *Sep 2023 – Jul 2027*

Experience

Datajar – AI Analytics — Nov 2025 – Present
Software Engineer (Part-Time) — *Berlin, Germany (Remote)*

- Architected the agentic write path: LLM-proposed Shopify, Meta, Zid and Salla writes, human-in-the-loop
- Engineered explainable BI over chat: per-figure lineage, zero-model-cost re-runs, drill-through, board packs
- Hardened the LLM layer: DSPy-compiled prompts, eval suites, and streaming-aware provider failover
- Owned 8 OAuth commerce and ads integrations, plus a connector layer syncing 2,795 scripts to 143 providers
- Closed a sandbox RCE (pandas readers, dunder walk); cut 1.6s cold start, 166 KB off 46 routes

Research

Installed, Launched, Probed | *Execution-Based Census of the MCP Registry* — Sep 2026
Sole author | Submitted to Empirical Software Engineering (Springer) — *Paper* | *Data* | *Harness*

- Executed all 6,106 installable servers (of 17,432 registry entries) in Docker sandboxes; only 63.5% handshake
- Disclosed to 15 maintainers: 6 fixed their servers, 3 reproduced it independently — GoReleaser #62 | StackQL #702
- Traced 88.4% unknown-tool deviation to SDK defaults; supplied first field data to a spec proposal — SEP-2145
- Found silent execution: 3.5% of servers run tools on schema-rejected arguments — TS SDK #2628
- Surfaced a stdio transport crash in the official Go SDK; its bug report credits this study — go-sdk #1209

Open Source

Kubeflow (CNCF, ML on Kubernetes) — Sep 2026 – Present
Kubeflow Org Member — *Membership*

- Made failed MCP tool calls return `isError` to clients instead of reporting success — mcp-server #282
- Made the MCP server accept the dotted torchtune runtime names that Trainer ships — mcp-server #233
- Fixed a nil dereference in Trainer's MPI plugin and extended the test that let it through — Trainer #4333

Kyverno (CNCF, Kubernetes policy engine) — Sep 2026 – Present
Contributor to the policy controllers, admission webhooks and CLI

- Made PolicyException updates reach namespaced CEL policies at once, across 3 policy controllers — Kyverno #17641
- Fixed colliding webhook names that made the API server reject image policy webhooks — Kyverno #17558

PipeCD (CNCF, GitOps) — Jul 2026 – Present
Open Source Contributor

- Stopped cancelled deployments from starting the next stage while rollback ran in parallel — PipeCD #6979
- Stopped piped leaking a cloned repo on every skip-stage check, in both piped and pipedv1 — #7021 | #7275

GitLab (GitLab Development Kit) — Sep 2025 – Jan 2026
Open Source Contributor — *25+ merged MRs*

- Removed false Nginx and Zoekt port-conflict reports by checking each process's working directory — MR !5345

Achievements & Certifications

- **Competitive Programming:** 2x ACPC Finalist | Meta Hacker Cup R2 Finalist — ICPC | Meta
- **Ratings:** Codeforces Expert (Top 1% Egypt), LeetCode Knight (Top 2% Globally) — Codeforces | LeetCode
- **Certifications:** AWS Certified Solutions Architect (SAA-C03) | Redis Certified Associate — AWS | Redis
- **Community:** ICPC IT Head, GDG IT Specialist, mentored 1K+, 50+ ECPC problems — ICPC | GDG | YouTube

Skills

Languages & Frameworks: Go, Python, TypeScript/JavaScript, C/C++, Java, SQL, NestJS, FastAPI, React, Next.js
MLOps & AI: Distributed training on Kubernetes, LLM agents, RAG, LangChain, vector databases, MCP, DSPy
Cloud & Infra: AWS, GCP, Kubernetes, Docker, Terraform, CI/CD, Linux, PostgreSQL, MongoDB, Redis, Kafka
